On Site Services

**RETAIL PRICE:** \$3500/day

## KEY FEATURES

- ✓ VSWR&IL Test
- ✓ Stability (1 port) test
- ✓ Documented results
- ✓ Over Time Comparisons
- ✓ CSV Export

## On Site RF Cable Validation

When was the last time your RF cables were performance tested? RF cables typically fall outside periodic calibration, and as such are often overlooked. They are essential components to measurements and yet and most often the largest contributing factor to measurement uncertainty. Because of age, re-connection, and handling, RF cable performance degrades overtime. TMS Test Services can test, document and track your cables performance so you can make informed decisions about your test cables.

TMS test services offers a 1/2 and 1 day on site RF cable validation service. Each cable is labelled and documented so you can audit and track cables performance and track the changes over time.
